

PREDICTIVE INDEX MANAGEMENT WORKSHOP™

**PUTTING THE PREDICTIVE INDEX[®]
TO WORK TO
IMPROVE YOUR BOTTOM LINE.**

A SOLID FOUNDATION FOR SUCCESS WITH THE PREDICTIVE INDEX PROCESS.

The Predictive Index (PI®) process is a powerful combination of education, consulting and assessment. It offers a new understanding of what makes people work, and helps you learn how to motivate them to work better. It helps you hire and retain talented people who are crucial to the success of your company. And it helps you build new leaders at every level of the organization.

And it all starts with the PI Management Workshop.

“ I was aghast at the thought of being out of the office for several days, but the time was truly well spent. I could immediately map PI back to pressing issues we faced in the organization and make decisions based on objective, behavioral criteria. And that objectivity has brought a whole new level of confidence to my decision making. I'm completely enamored with the Predictive Index. ”

*Lisa Daigle, President
DataSys Corporation*

“ I felt like I was learning a whole new language. I felt like I was understanding things that I should have understood my entire business career, but nobody had ever explained them to me. It was a revelation. ”

*Mark Ain, CEO
Kronos*

“ How did I ever function in HR for 15 years without this awesome tool for communication, reducing turnover and increasing morale? ”

*Kelly Fisher, HR Manager
IKEA*

“ Since the Predictive Index has been used worldwide...managers and key staff have been recruited, promoted and transferred with a remarkable precision of predicting not only one person’s skills, but the ideal and optimal combination of individuals to form dynamic teams. And the system has proven as accurate and valuable in the USA, Europe, Asia, Africa or Latin America. ”

*Bertil Hagman, Executive Chairman
SinterCast AB (Publ)*

“ If you can get your management team to work more effectively and communicate better, then you are heads up over your competition and I think that is what the Predictive Index can do. ”

*John Long, CEO
United States Equestrian Federation*

“ Industry is making changes from a less command-and-control type leadership to an influence and facilitating style, and I believe the Predictive Index is a very valuable tool in learning how to execute that. ”

*Paul Kreider, Director of Human Resources
Hershey Foods Corporation*

You’ll gain valuable insight into your people—and your business.

In the customized, highly interactive workshop setting, experienced consultants will introduce you and your leadership team to the Predictive Index process. You’ll quickly “learn the language” of PI and become skilled at working with all its elements. Most importantly, you’ll gain valuable insight into the many ways you can use PI’s proven, proprietary process to motivate, lead and enable your people to achieve your company’s goals.

The PI Management Workshop is not just a one-time event, but the beginning of a new process of more effective management, one that will have an immediate and profound impact on virtually every aspect of your business. It will equip you and your management team to make more effective people decisions that result in a more productive workplace and a more profitable bottom line.

The workshop covers a wide range of leadership and work performance topics focused on enhancing your abilities in a number of key areas:

"People-Smart" management for improved bottom-line performance

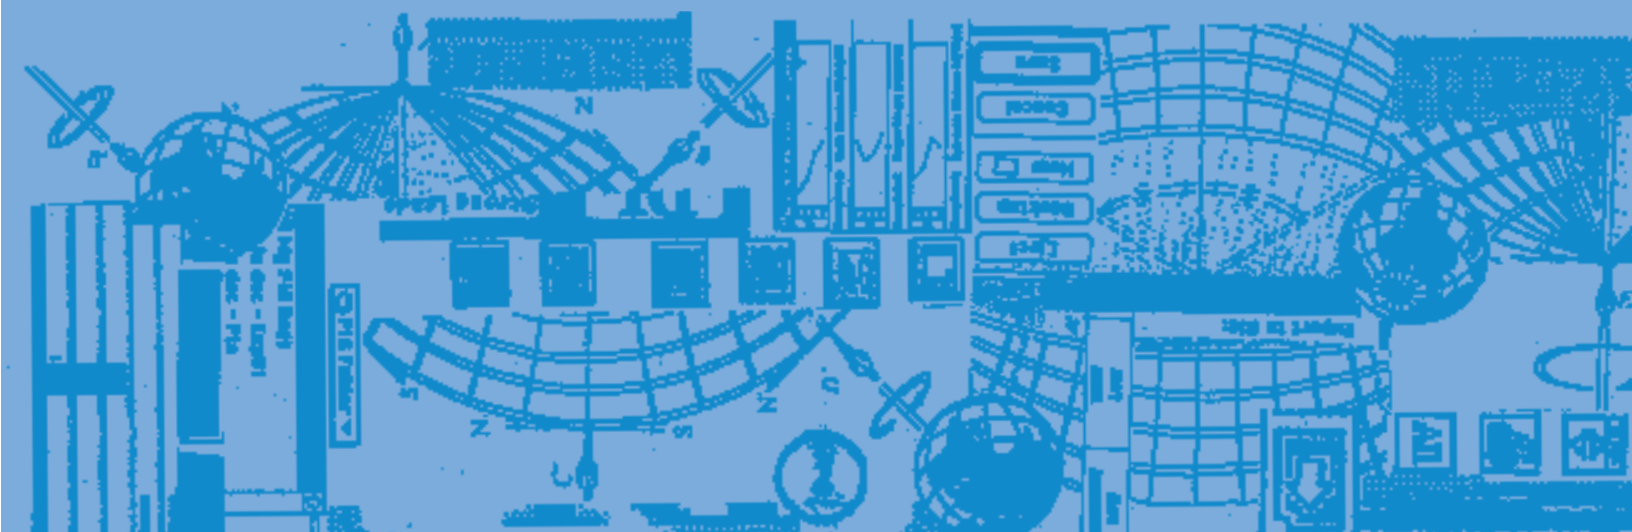

- Learn about your own management and leadership style and understand how it impacts your entire organization.
- Develop, manage and motivate each person individually by recognizing their distinctive motivations.
- Improve teamwork and enhance productivity at all levels by gaining a deeper understanding of each person’s decision-making, communication and delegation style.
- Increase sales by putting the right people in key sales positions.

Recruiting and hiring the people who will grow your business

- Make the right hire, the first time, and avoid costly turnover by using behavioral criteria to objectively and accurately assess the potential of job candidates.

Building leaders throughout the company

- Advance the leadership skills of your senior managers.
- More effectively identify the fits and gaps between employees and their next position, and create a unique development plan to help them get there.

Who should attend?

This workshop is designed for your company's leadership team—the people charged with strategic management, human resource management and bottom-line profitability. Usually, client companies train their senior executives first, followed by other key managers with day-to-day responsibility for the development and productivity of the people in their departments or groups.

One of the best investments you can make in your business.

The PI Management Workshop requires a commitment of your time and energy, and we know that time is a precious commodity, especially for busy managers. We're confident you'll find the workshop to be the most productive, most effective learning experience of your business career.

In every workshop we customize the discussion to focus on the issues most important to your organization. Every bit of the training is applicable to real-world problems, and every participant completes the course with all the tools necessary to achieve immediate, sustainable results.

Would you like to make the most of your most valuable resource—and improve your performance, productivity and profitability? We'd like to help. For more information about the Predictive Index Management Workshop, or any of the other services we offer, please call or visit us on the Web, and we'll put you in touch with one of our experienced PI consultants.
